

THE LEAF CATCHER

for overflow pools

Lavage leaf catcher

- Open slide valve **C**, leaves are washed into the drain
- Close slide valve **C**

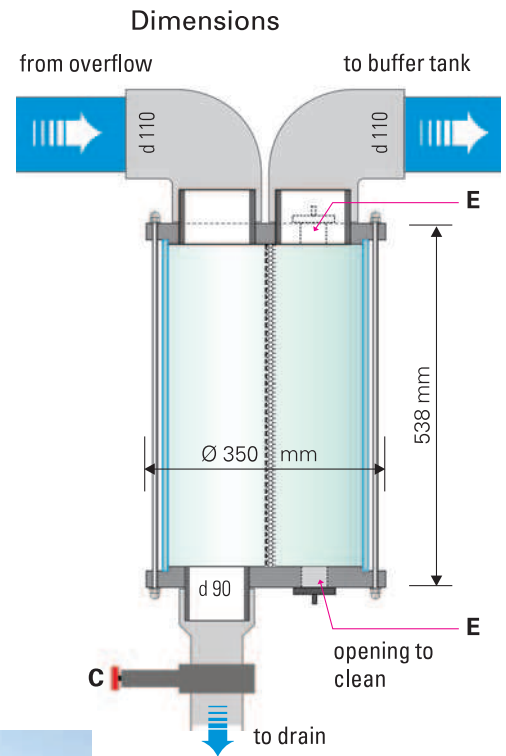

The rinsing process is running or parked at pump done

Includes:

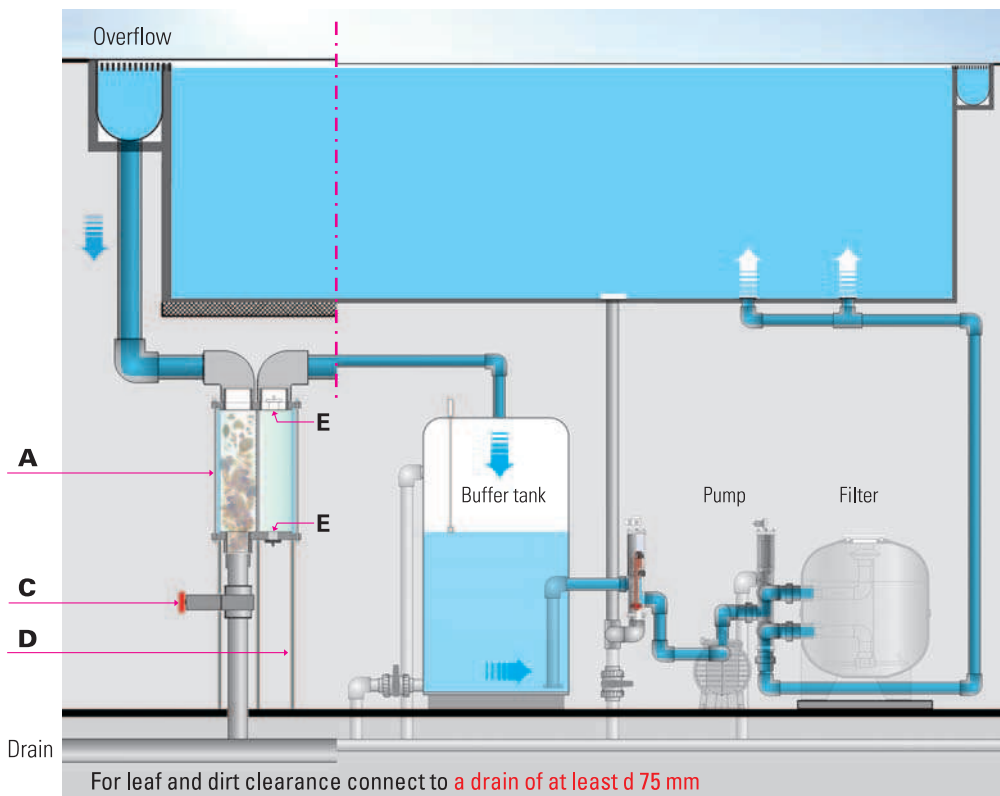

- A** 1 x transparent leaf catcher, fully assembled with stainless steel (AISI 316) catcher wall with 3 mm holes, 2 x 90° bends (Ø 110 mm) for connecting from overflow to buffer tank (packed loose)
- C** 1 x slide valve (Ø 75 mm) with reducer 90-75 mm (packed loose) Open valve to clean leaf catcher
- E** Opening to clean, 2 plugs 1 1/2"

Not included, must be ordered separately:

- D** Floor mounting: Stainless steel rods set **D** (3 pieces) in lengths of 50, 75 or 100 cm

Installation diagram

→ If the overflow channel is wider than 110 mm, fit a bypass to the system.
